EDUCATION

University of Nairobi

SEPTEMBER 2023 - SEPTEMBER 2027

I am currently in my third year of study pursuing a Bachelors degree in Microprocessor Technology and Instrumentation.

Relevant coursework: IT fundamentals, embedded systems, electronics

Precious Blood Secondary School Riruta

JANUARY 2019 - DECEMBER 2022

Pursued my highschool certificate where I achieved a grade B plain.

PROJECTS

Ecommerce Project

Created an Ecommerce relational database implemented for MySQL that stores product information and sales.

CORD-19 research Python framework

Created a python framework that analyzed, cleaned and created data visualisations of the CORD-19 research dataset using the metadata.csv file.

Professional Developer Portfolio

Designed and developed a responsive personal portfolio website to showcase technical skills, certifications, and projects. Deployed the website using github pages for public access.

Smart Weather Station

Developed a simple weather station based on ESP32 that reads temperature and humidity in a room using the DHT11 sensor, displays data on an OLED Display, and use LEDs to indicate weather conditions in real life.

SKILLS

-Mysql

-Python

-HTML/CSS

-Rust

-C++
